4-(4-Methoxyphenyl)-2-oxo-1,2,5,6-tetrahydrobenzo[*h*]quinoline-3-carbonitrile

A. M. Asiri, H. M. Faidallah, A. O. Al-Youbi, K. A. Alamry and S. W. Ng

Abstract: In the molecule of the title compound, C₂₁H₁₆N₂O₂, the tetrahydrobenzo[*h*]quinoline fused-ring system is buckled owing to the ethylene -CH₂CH₂- fragment, the benzene ring and the pyridine ring being twisted by 19.7 (1)°. The 4-substituted aromatic ring is bent away from the pyridine ring by 50.3 (1)° in order to avoid crowding the cyanide substituent. In the crystal, two molecules are linked by a pair of N-H...O hydrogen bonds to form a centrosymmetric dimer.
